

# Verificator A (Tim LPMQ)

Verifying entity labels  
from LLMs on assigned  
documents

Approve labeled  
named entities and  
respective classes

Change named entity  
classes

Change entities span

Contoh:  
... anak cucu **Adam** ....  
↓  
... **anak cucu Adam** ...

Identifying candidates for  
named entity classes or  
named entities on the text

Define named entity  
class candidates

Label respective named  
entities/named entity  
candidates with named  
entity class candidates

Define named entity  
candidates (the  
classes already exist)

Label named entity  
candidates with existing  
named entity classes

View All assigned  
documents

Mark verifying document  
is done
